

WXZ

Four teams compete to fish the waters off Scalene Island. Government restrictions only allow fishing boats to fish for 10 days each season. There are four sectors (W, X, Y, and Z) and a fishing boats may only fish in two of those sectors each season. Ports themselves are not considered part of a sector. After 10 days of fishing, boats automatically return to port.

Circles with two colored halves will catch one (1) of each type of fish.

Information on the Mahi Mahi is included below. Information on the other six fish can be purchased for \$40/fish or \$200 if all information is purchased at once. Teams may share information but may not make deals involving the payment/reimbursement of money.

If the SUSTAINABLE FISHING LEVEL is exceeded in a season, the CONSERVATION STATUS will downgrade a classification. If the SUSTAINABLE FISHING LEVEL is exceeded by more than 20% (rounding up), the CONSERVATION STATUS of the fish will downgrade an additional classification. Once an animal is **EW** (Extinct in the Wild) boats will no longer catch that species.

Teams must submit their fishing schedules pursuant to the restrictions above for the SPRING, SUMMER, FALL, and WINTER seasons in a well-organized spreadsheet. It must include:

- 10 days of fishing for each season using the labels (X1, W5, Z4, etc.) to indicate position*
- The number and type of fish expected to be caught each day*
- Totals for number of fish of each type per season*
- Names of all team members*
