

# MOONSHOT

*In 1965, the US government spent over 4% of its annual budget on NASA's race to the moon. In 2020, hoping to spur similar advances in critical fields, the United States government has made \$1 trillion available in increments of \$100 billion. Where should the money be spent to create the best of all possible worlds?*

advance

ART

*support the expression of creativity in all forms*

\$

provide

# BASICS

*provide food, clean water, shelter, and safety to those most in need*

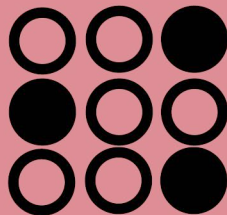

---
