

DIE FISCHE

Scalene Island has two ports, Northport and Southport. Each port has historic fishing routes that target seven species of fish: gangfisch, maifisch, finte, blauhais, barbe, zoep, and silberlachs. Each team will have the option of utilizing one or both ports for a fishing year. Fishing routes are determined by season, but any team may change their route after the season ends. Each season a boat will return 72 fish equally divided among the species of fish endemic to that fishing route. Each species of fish also has a conservation status: least concern, vulnerable, endangered, and extinct in the wild. If the sustainable level of fishing is exceeded, the conservation status will be downgraded. If a fish is “extinct in the wild” no more fish of that species will be caught.

Each team may select three (3) unique pieces of information. Teams may elect to share or not share the information. Scores will be determined as follows:

50% on REFLECTION your team's strategy (with respect to markets, conservation, cooperation) and the motivations and ethics of fishing
50% on PROFIT

BARBE MARKET (1), BARBE CONSERVATION (2), BLAUHAI MARKET (3), BLAUHAI CONSERVATION (4), FINTE MARKET (5), FINTE CONSERVATION (6), GANGFISH MARKET (7), GANGFISH CONSERVATION (8), MAIFISCH MARKET (9), MAIFISCH CONSERVATION (10), SILBERLACHS MARKET (11), SILBERLACHS CONSERVATION (12), ZOPE MARKET (13), ZOPE CONSERVATION (14)
